Learning and practicing (CME)

From professional to master – Good doctors out of passion

Welcome to Medizin im Grünen, your medical centre of excellence at the gates of Berlin, where professionals and masters bring their medical skills to perfection in routine and unexpected situations. Learn from lecturers who are masters in their specialities and are passionate about passing on their experiences and skills. Take advantage of the focused stillness to learn and practice without any distractions – away from the hustle and bustle of the clinical environment, but surrounded by state-of-the-art medical devices and the usual professional equipment.

Our instructors, partners and the Medizin im Grünen team will devote their undivided attention and maximum commitment to you.

“The only way to make happen what is possible is to persist in chasing the impossible.”

(Hermann Hesse)

Kind regards,
Dr. Heiko Ziervogel

Owner and Managing Director

First of all – our quality commitment:

Our seminar programme is transparent. In addition to the planned subjects and dates, it contains the renowned persons involved, the learning objectives, the methods used, the medical equipment as well as the respective theoretical and practical part. You will find in it all services we provide to successfully complete your seminar.

Lecturers:

Our lecturers are instructors and experts in their respective medical specialities. They advise, support and promote young and experienced colleagues during the further training courses at our medical centre of excellence.

Target group:

You are a young surgeon, an experienced medical professional or a committed nurse and wish to improve your professional skills or refine your surgical techniques? You are employed by a medical or pharmaceutical company and would like to plan your own training seminars? We provide you advice and support as an experienced provider of further training courses in the medical and care sector.

Learning objectives:

Our medical education offering is aimed at surgeons and surgical assistants as well as nurses in the following medical disciplines: anaesthesia, intensive care medicine, trauma surgery, orthopaedic surgery, general surgery, visceral surgery, cardiothoracic surgery, paediatric surgery, neurosurgery, urology, gynaecology, oncology, pneumology, neonatology, paediatric medicine, gastroenterology, plastic surgery, radiology and pathology.

Learning contents:

Our interdisciplinary and interprofessional seminars focus on practicing diagnostic and therapeutic sub-steps or complete procedures and the confident handling of routine and unexpected situations.

Learning methods:

How does professional medical training in diagnosis and treatment work without a patient? At our centre, you will work with carefully and responsibly selected models, ranging from computer-based simulations and animal or human specimens to anaesthetised animal models. Your learning success is our mission.

Learning rooms:

Our facility offers you ten medical functional rooms and four seminar rooms to learn, practice and expand your skills. The modern cafeteria with its spacious terrace provides an inviting place for you to have professional discussions or take a moment to relax.

Number of participants:

We recommend that the learning groups are set up similarly to the hospital setting. Medizin im Grünen organises further training courses for individual groups, ranging from small surgical teams consisting of two persons to workshop series for up to 90 persons at the same time. We will be happy to provide you advice and support you in developing and implementing your own seminar concepts.

Dates:

Our seminar team is at your disposal from Mondays to Sundays between 8.00 am and 6.00 pm. We will give you a warm welcome and provide you comprehensive support with serenity and patience all the way to the successful completion of your seminar. Contact us in good time to arrange the dates and the necessary resources.

CME:

Professional accreditations, regulatory approvals and cer-

tifications by the German regional medical associations have been obtained for all educational activities.

Overnight stay:

You need recommendations or support for your travel planning? We know the hotels in our vicinity and will be happy to make a reservation for you according to your requirements.

The proof of quality – yourYour feedback:

Just like you, we want to be among the best. As a participant, you will have the opportunity to rate every instructor, the Medizin im Grünen team and our suppliers. Feel free to compare us with similar providers.

Get in touch with us:

Our experienced organisational team is at your disposal for all questions. Call us on: +49 33679 429810 or contact us by email: info@medizin-im-gruenen.de

Good doctors out of passion

Doctor at last!

You are in the profession of your dream and have advanced your career to now being immersed in day-to-day clinical practice? You are passionate about treating patients together with experienced specialists. The lives of many patients depend on the success of your work. You grow your knowledge and skills on a daily basis: You learn from personal experience, the advice of your colleagues and the expertise of the best. You appreciate every moment you can spare to contemplate your work and systematically structure your knowledge.

100% practice

Where can you learn to perform a complex surgical procedure? At our medical centre of excellence. And what's more: You are trained by experienced colleagues, supporting you step-by-step through a complex surgical procedure and the treatment of severe disease. You are the surgeon who performs the operation, while making every decision as part of a team. You keep practicing the surgical procedures until you are fully confident and have mastered the technique to perfection. The patient is a dummy designed with all the features required for the surgery. You are working with state-of-the-art technologies and experienced assistance in a protected space for professionals and masters. With regard to the outcome, you act the same as in day-to-day practice – always measured on success.

A wide range of methods and models

Professional medical training in diagnosis and treatment – but without a patient? Before the start of each seminar, you will reflect on the current knowledge and evidence base – quickly and concisely. Then you will start training in small teams, instructed by experienced colleagues. The focus is on the training of sub-steps or complete procedures, on gaining confidence in handling routine and unexpected situations. The required patient features are simulated. You will be working with carefully and responsibly selected models—from computer-based simulations to animal and human specimens to the anaesthetised animal model. The selection will always be based on what is needed to achieve the agreed learning objectives. Of course, compliance with ethical and legal requirements is ensured. Professional accreditations and regulatory approvals have been obtained for all educational activities.

From professional to master

Solid variety

Our medical education offering is aimed at professionals and masters: career beginners, advanced learners and experts. It is open to individual doctors or entire teams. All lecturers are masters in their specialities and colleagues who are passionate about passing on their experiences and skills. The topics of our seminars are based on the recommendations of the professional societies and your personal learning objectives; they are certified by the German regional medical associations. Our current offering includes seminars for anaesthetists, intensive care physicians, trauma, orthopaedic, general, visceral, thoracic-cardiac and paediatric surgeons, neurosurgeons, urologists, gynaecologic oncologists, pulmonologists, neonatologists, paediatricians, gastroenterologists, plastic surgeons, radiologists, and pathologists.

Focussed stillness

Medizin im Grünen operates a medical centre of excellence for doctors – close to the city life and directly at the Scharmützel Lake. On an area of more than 1,300 square metres, the best conditions for creative learning and thorough training are waiting for you. Far away from the hustle and bustle and responsibilities of the hospital environment, you will find a focussed stillness at Medizin im Grünen, enabling you to concentrate on performing surgeries and work undistractedly. Take advantage of this exceptional opportunity and the expertise of our lecturers. Focus on what matters most – for the benefit of your patients and your medical career.

Transparency succeeds

For us, maximum transparency is part of quality. Just like you, we are passionate about being among the best. That is why we are dedicated to quality assurance and evaluate every seminar according to predefined criteria. We provide a detailed description of each educational content. As a participant, you will always have the opportunity to rate the lecturers and the learning environment at the end of the training. The company is DIN EN ISO 9001:2008-certified. Feel free to compare us with other providers. The feedback given by participants and lecturers is also available at our Quality Monitor on www.medizin-im-gruenen.de. Simply choose the best medical education offering!
