Medical Centre of Excellence

## Seminar Programme

## Organ Transplantation

### **„Learning by doing“:**

Transplantation surgery, like all other specialisations in the surgical subjects, lives from regular participation in targeted continuous education. At the TOP course, you will meet lecturers, all masters in their specialty, for whom passing on their own experience and skills is a matter close to their hearts. Here, you will improve your surgical skills in extensive practical exercises, you will gain a wealth of experience in handling the most suitable models. You will practice preparing, resecting and anastomosing in the context of typical donor and recipient operations, always actively working in small teams with similarly experienced colleagues.

### **„Feedback matters“:**

This surgery course lives from collegial feedback. At the beginning, we will test your practical skills to determine your current level and ideal group compositions. On all surgery days you will receive comprehensive feedback from your personal trainer and colleagues in your team. Finally, you will take part in a realistic test with all your acquired skills and experience. You will prove yourself in a well simulated donor and recipient operation on an anaesthetised animal model.

We look forward to your participation. Over the past 18 years, the TOP course has accompanied many of your experienced colleagues on their way to professional mastery.

### **Lecturers:**

***Prof. Dr. med. habil. Falk Rauchfuß***

University hospital Jena

***Prof. Dr. med. Andreas Schnitzbauer***

University hospital Frankfurt am Main

***Dr. med. Thomas Vogel***

University hospital Münster

***Prof. Dr. med. Felix Braun***

University hospital Schleswig-Holstein

**Target group:**  **ADVANCED PROFESSIONALS**  **EXPERT**

Specialists, experienced assistants from transplant centres

## Learning goals:

This training course follows the recommendations of Professional societies, in particular the DGAV and DTG.

## Learning contents:

*Day 1 16.00 pm – 20.00 pm*

### **Theory:**

- Introduction to the course Surgical basics

### **Practice:**

- „Operational exercise“

*Day 2 08.30 am – 17.30 pm*

### **Theory:**

- kidney and pancreas transplantation Immunosuppression (Chiesi GmbH)

### **Practice:**

- Vascular, Bilio, Enteric Anastomosis
- Living Donor Nephrectomy
- Kidney Transplantation

*Day 3 08.30 am – 17.30 pm*

### **Theory:**

- Techniques of multi-organ harvesting

### **Practice:**

- Vascular, Bilio, Enteric Anastomosis
- Kidney Transplantation
- Donor hepatectomy

*Day 4 08.30 am – 17.30 pm*

### **Theory:**

- Immunosuppression

### **Practice:**

- Vascular, biliary, enteric anastomoses
- Kidney Transplantation
- Receiver hepatectomy and creation of a portocaval shunt
- Repetition of the „Operative Exercise“ of the 1st day

*Day 5 07.30 am – 17.30 pm*

### **Theory:**

- liver transplantation

### **Practice:**

- Donor hepatectomy
- Receiver hepatectomy
- Liver Transplantation

## Learning methods:

### **Theory: 9 units**

- Lectures
- Discussions

### **Practice: 44 UE**

- Practical exercises on organ models
- Practical exercises on narcotised animal models

1 teaching unit (UE) = 45 min, plus approx. 4 units break time over all Seminar days distributed

## Number of participants: Dates:

16 persons

**TOP-48** 16.06.-20.06.2021

**TOP-49** Date to follow

## CME:

**54 points** at the Brandenburg Medical Association

This event is also recognized by DGAV, DTG and ESOT.

## Participation fee:

2.600,00 Euro incl. VAT\*

\* participation fee for events in 2020

4.500,00 Euro incl. VAT\*\* as participation fee without sponsoring

\*\* Information on transparency in accordance with the recommendations of the German Medical Association on continuing medical education, in particular § 8 para. 1 no. 3 MFO

(Detailed information on sponsoring is available at: [www.medizin-im-gruenen.de](http://www.medizin-im-gruenen.de))

The price includes the seminar documents, catering during the seminar time as well as a joint dinner.

## Overnight stay:

Simply book via  **HRS**. You get the link with of the registration confirmation.

With the friendly support of:

12.000 €

A Sandoz Brand

10.000 €

## Good doctors out of passion

### Doctor at last!

You are in the profession of your dream and have advanced your career to now being immersed in day-to-day clinical practice? You are passionate about treating patients together with experienced specialists. The lives of many patients depend on the success of your work. You grow your knowledge and skills on a daily basis: You learn from personal experience, the advice of your colleagues and the expertise of the best. You appreciate every moment you can spare to contemplate your work and systematically structure your knowledge.

### 100% practice

Where can you learn to perform a complex surgical procedure? At our medical centre of excellence. And what's more: You are trained by experienced colleagues, supporting you step-by-step through a complex surgical procedure and the treatment of severe disease. You are the surgeon who performs the operation, while making every decision as part of a team. You keep practicing the surgical procedures until you are fully confident and have mastered the technique to perfection. The patient is a dummy designed with all the features required for the surgery. You are working with state-of-the-art technologies and experienced assistance in a protected space for professionals and masters. With regard to the outcome, you act the same as in day-to-day practice – always measured on success.

### A wide range of methods and models

Professional medical training in diagnosis and treatment – but without a patient? Before the start of each seminar, you will reflect on the current knowledge and evidence base – quickly and concisely. Then you will start training in small teams, instructed by experienced colleagues. The focus is on the training of sub-steps or complete procedures, on gaining confidence in handling routine and unexpected situations. The required patient features are simulated. You will be working with carefully and responsibly selected models—from computer-based simulations to animal and human specimens to the anaesthetised animal model. The selection will always be based on what is needed to achieve the agreed learning objectives. Of course, compliance with ethical and legal requirements is ensured. Professional accreditations and regulatory approvals have been obtained for all educational activities.

# From professional to master

## Solid variety

Our medical education offering is aimed at professionals and masters: career beginners, advanced learners and experts. It is open to individual doctors or entire teams. All lecturers are masters in their specialities and colleagues who are passionate about passing on their experiences and skills. The topics of our seminars are based on the recommendations of the professional societies and your personal learning objectives; they are certified by the German regional medical associations. Our current offering includes seminars for anaesthetists, intensive care physicians, trauma, orthopaedic, general, visceral, thoracic-cardiac and paediatric surgeons, neurosurgeons, urologists, gynaecologic oncologists, pulmonologists, neonatologists, paediatricians, gastroenterologists, plastic surgeons, radiologists, and pathologists.

## Focussed stillness

Medizin im Grünen operates a medical centre of excellence for doctors – close to the city life and directly at the Scharmützel Lake. On an area of more than 1,300 square metres, the best conditions for creative learning and thorough training are waiting for you. Far away from the hustle and bustle and responsibilities of the hospital environment, you will find a focussed stillness at Medizin im Grünen, enabling you to concentrate on performing surgeries and work undistractedly. Take advantage of this exceptional opportunity and the expertise of our lecturers. Focus on what matters most – for the benefit of your patients and your medical career.

## Transparency succeeds

For us, maximum transparency is part of quality. Just like you, we are passionate about being among the best. That is why we are dedicated to quality assurance and evaluate every seminar according to predefined criteria. We provide a detailed description of each educational content. As a participant, you will always have the opportunity to rate the lecturers and the learning environment at the end of the training. The company is DIN EN ISO 9001:2008-certified. Feel free to compare us with other providers. The feedback given by participants and lecturers is also available at our Quality Monitor on [www.medizin-im-gruenen.de](http://www.medizin-im-gruenen.de). Simply choose the best medical education offering!
